Professional Summary

Aspiring Full Stack Developer with skills in Python (Flask, Django), Java, SQL, and Data Structures & Algorithms. Experienced in building web applications, REST APIs, and database-driven solutions. Passionate about developing scalable software and solving real-world problems.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering	2023 – 2026
SR University, Warangal	CGPA: 8.3 / 10

Experience

Infosys Springboard Virtual Internship (Ongoing)	2026
Python Full Stack Development Intern	

- Working on Python Full Stack Development concepts using Django and Flask.
- Developing responsive web applications using HTML, CSS, JavaScript, and Python frameworks.
- Building RESTful APIs and implementing database operations using MySQL.
- Applying Git and GitHub for version control and collaborative development.

Core Competencies

- | | |
|---|-------------------------------------|
| • Backend Development (Flask, Django) | • RESTful Application Design |
| • Java and Object-Oriented Programming | • MVC / MVT Architecture |
| • Role-Based Authentication and Authorization | • Data Structures and Algorithms |
| • Agile Development and Git | • Database Design and Normalization |

Technical Skills

Languages: Python, Java, SQL, JavaScript	Databases: MySQL, PostgreSQL
Frameworks: Flask, Django	Tools: Git, GitHub, VS Code
Frontend: HTML, CSS, Bootstrap	Concepts: OOP, DBMS, OS, CN, DSA, REST APIs

Projects

Path of Goals – AI-Powered Personalized Learning	<i>Django, Python, Groq API, YouTube Data API</i>
---	---

- Developed an AI-powered web application that generates personalized learning roadmaps based on user-selected skills, domains, and career goals.
- Integrated the Groq API to dynamically create structured learning paths, topic sequences, and skill development recommendations.
- Utilized the YouTube Data API to automatically fetch and display relevant educational videos for each learning concept and roadmap stage.
- Built a responsive Django-based platform with user-friendly interfaces for roadmap generation, progress tracking, and resource exploration.

Collaborative Task & Project Management System	<i>Flask, HTML, CSS, PostgreSQL</i>
---	-------------------------------------

- Developed a complete web application for project management using **Python (Flask)** with multi-tenancy and team collaboration features.
- Implemented **role-based access control (RBAC)** using Flask-Login for secure user authentication and permission handling.
- Designed a real-time dashboard to display task status, including active, overdue, and completed tasks.
- Utilized PostgreSQL to ensure efficient data management and maintain relational integrity.

Achievements

- Semi-Finalist in the **ET-AI Hackathon 2026** conducted by **The Economic Times**.
